(54) PRESSURE-SENSITIVE ADHESIVE FABRIC TAPE FOR WIRE HARNESS BUNDLING

(57) The present invention relates to a cloth adhesive tape for binding a wire harness used for binding the insulated conductors of a wire harness. An adhesive layer 12 is put on the one surface of a substrate 11 made of a non-woven fabric and having small through holes 15 throughout the area thereof, and a resin layer 13 is put on the other surface of the substrate 11, and a release agent layer 14 is put on the resin layer 13. This can prevent the delamination of the substrate 11 and can improve a sound-damping property, a hand-tearing property, and a fire resistance.
